

Guidance

Print this page at 100% scale (do not fit to paper)

Make sure the ring you're measuring is worn on the same finger you're planning to wear your new ring on

Place the ring over the circles above until the edge of the circle aligns with the inside diameter of the ring

The ideal fit is comfortable to wear, snug over the knuckle and not likely to slip off unnoticed

Consider sizing up slightly if you're measuring for a wide band or stacking multiple rings together, for a more comfortable fit

There's usually a slight difference between the left & right hand, and fingers shrink & swell slightly throughout the day
